To whom it may concern,

I am a Sound Designer / Audio Editor from Bainbridge Island, Washington. I recently graduated from Berklee College of Music with a degree in Electronic Production and Design. With knowledge of industry standard practices and an inkling for sonic experimentation, I believe that I will be an excellent candidate for your next Sound Designer

From sound design to foley artistry / editing, I have a great deal of experience in all post production audio-related aspects. Whether it is bringing sci-fi sparkle and sheen or detailed realism, I will be able to fulfill your sonic wishes. As an avid movie lover, I know that the soundtrack is one of the biggest contributing factors to the immersion the audience feels. Having the opportunity to help provide that feeling and create a world alongside your company in one of the best cities in the world would be an absolute privilege.

Others have described me as an anchor of positivity, a team player, and quick to adapt to new challenges. With experience in a wide array of audio tools and practices, I will be able to add these attributes to your already impressive environment.

Feel free to reach out to me if there is anything else I can do for you on my end.

All the best,
Adam Daniel Jones
